SUMMARY:

Aspiring AI/ML Engineer with hands-on internship and project experience in Machine Learning, Python, predictive modelling and model evaluation.

TECHNICAL SKILLS:

Programming Languages: C, Python, Java

Machine Learning: Scikit-Learn, Supervised Learning, Model Evaluation, Feature Engineering

Data Processing: NumPy, Pandas

Tools & Platforms: Google Colab, Jupyter Notebook, Power BI, Git, GitHub

Database: MySQL, MongoDB

Deployment & Cloud Platforms: Netlify, Vercel, Render, AWS, Railway, Streamlit

EXPERIENCE:

AI Intern – Edunet Foundation | October 2025-November 2025

- Developed an AI-powered helmet detector using CNN and YOLOv8n.
- Trained model with real-world data and achieved 74.9% mAP50.

PROJECTS:

- **ProMail AI - AI Powered Email Assistant**

Technologies: Python, Streamlit, Generative AI, NLP

- Developed an AI-powered email assistant for generating professional emails, drafting replies, and improving email content.
- Implemented features for grammar checking, email summarization, translation, tone adjustment, and email analysis.
- Integrated productivity tools for email templates, subject line generation, signature creation, and email quality scoring.
- Live Demo : https://promail-ai-debdut-nandy.streamlit.app/
- GitHub : https://github.com/Deb124-source/ProMail-AI-Debdut-Nandy.git

- **Helmet Detection — AI-Based Road Safety System**

Technologies: Python, YOLOv8n, Computer Vision, Google Colab

- Developed an object detection model using YOLOv8n to identify motorcyclists riding without helmets.
- Implemented bounding-box detection and confidence scoring to locate potential helmet violations in images.
- Trained and tested the model on road traffic images for automated helmet compliance monitoring, achieving 74.9% mAP50 on the evaluation dataset.
- GitHub : https://github.com/Deb124-source/Helmet_Detection_System_Debdut_Nandy.git

- **Course Recommender AI — Personalized Course Recommendation System**

Technologies: Python, Scikit-learn, TF-IDF, Cosine Similarity, Streamlit

- Developed a content-based recommendation system to suggest relevant online courses based on users' skills and interests.
- Applied TF-IDF vectorization and cosine similarity to match user inputs with relevant course descriptions.
- Live demo : https://course-recommendation-system-debdut-nandy.streamlit.app/
- GitHub : https://github.com/Deb124-source/Course-Recommendation-System-Debdut-Nandy.git

EDUCATION:

B.Tech in Computer Science and Engineering (Artificial Intelligence & Machine Learning) from Brainware University, West Bengal (9.4 CGPA) [2024 – 2028]

CERTIFICATIONS: Agentic AI Certified Foundations Associate – Oracle University | Introduction to Cloud Infrastructure: Describe Cloud Concepts - Microsoft
